

PLANNING COMMISSION CITY OF PLEASANTON

ALAMEDA COUNTY, CALIFORNIA

RESOLUTION NO. PC-2016-13

RESOLUTION APPROVING A DESIGN REVIEW FOR  
TERRY TOWNSEND, ARCHITECT, ON BEHALF OF PAUL BOMMARITO, AS FILED  
UNDER CASE P15-0620

WHEREAS, Terry Townsend, Architect, on behalf of Paul Bommarito, has applied for Design Review approval to construct an approximately 5,398-square-foot, two-story custom home on an approximately 1.97-acre parcel located at 3 Winding Oaks Way; and

WHEREAS, zoning for the property is PUD-HR/OS (Planned Unit Development – Hillside Residential/Open Space) District; and

WHEREAS, at its duly noticed public hearing of May 11, 2016, the Planning Commission considered all public testimony, relevant exhibits, and recommendations of the City staff concerning this application; and

WHEREAS, this project was programmatically reviewed as part of the Vineyard Avenue Corridor Specific Plan Environmental Impact Report (EIR), which was certified on June 1, 1999; and Pursuant to Section 15182 of the California Environmental Quality Act (CEQA) Guidelines, no additional environmental review is required for residential projects that are proposed in accordance with a Specific Plan for which CEQA documentation was certified after January 1, 1980; and

WHEREAS, the Planning Commission determined that the architectural style and design of the proposed project is appropriate for the Vineyard Avenue Corridor Specific Plan.

NOW, THEREFORE, THE PLANNING COMMISSION OF THE CITY OF PLEASANTON RESOLVES THE FOLLOWING:

Section 1. Approves Case P15-0620, the application of Terry Townsend, Architect, on behalf of on behalf of Paul Bommarito, for Design Review approval to construct an approximately 5,398-square-foot, two-story custom home on an approximately 1.97-acre parcel located at 3 Winding Oaks Way, subject to the conditions shown in Exhibit A, attached hereto and made part of this case by reference.

Section 2. This resolution shall become effective 15 days after its passage and adoption unless appealed prior to that time.

Resolution No. PC-2016-13  
Page Two

THIS RESOLUTION ADOPTED BY THE PLANNING COMMISSION OF THE CITY OF PLEASANTON ON THE 11<sup>TH</sup> DAY OF MAY 2016 BY THE FOLLOWING VOTE:

AYES: Commissioners Allen, Balch, Nagler, O'Connor, and Ritter  
NOES: None  
ABSTAIN: None  
RECUSED: None  
ABSENT: None

ATTEST:

Adam Weinstein  
Secretary, Planning Commission

Herb Ritter  
Chair

APPROVED AS TO FORM:

Larissa Seto  
Assistant City Attorney

**EXHIBIT A  
CONDITIONS OF APPROVAL**

**P15-0620  
3 Winding Oaks Way, Bommarito Residence  
May 11, 2016**

**PROJECT SPECIFIC CONDITIONS OF APPROVAL**

**Planning Division**

1. The proposed Design Review shall conform substantially to the project plans, view simulations, and color and material board Exhibit B, dated "Received March 22, 2016," on file with the Planning Division, except as modified by the following conditions. Minor changes to the plans may be allowed subject to the approval of the Director of Community Development if found to be in substantial conformance to the approved exhibits.
2. The Design Review will lapse and shall become void one year following the date on which the Design Review became effective, unless prior to the expiration of one year a building permit is issued and construction which was the subject of the Design Review application is commenced and diligently pursued toward completion on the site, or the applicant or his or her successor has filed a request for extension with the Director of Community Development pursuant to the provisions of the Pleasanton Municipal Code Section 18.12.030.
3. Prior to issuance of a building permit, the applicant shall submit a growth management application for Zoning Administrator review and action. The growth management approval shall be granted prior to issuance of a building permit.
4. The applicant shall obtain all required City permits prior to construction.
5. All conditions of approval for this case shall be reprinted and included as a plan sheet(s) with the building permit plan check sets submitted for review and approval. At all times these conditions of approval shall be on all grading and construction plans kept on the project site.
6. All windows shall be recessed divided light design. If simulated mullions are used, they shall be located on both sides of the glass.
7. The applicant shall submit a final landscape and irrigation plan within the building permit plan set to the Planning Division for review and approval before installation. Details of the fencing shall be included with the landscape and irrigation plans. Said landscape plan shall be detailed in terms of species, location, size, quantities, and spacing. Plant species shall be native/indigenous and of drought tolerant nature with an irrigation system that maximizes water conservation (e.g., drip system).

8. The project shall comply with the State of California Model Water Efficient Landscape Ordinance and Bay Friendly Basics Landscape Checklist. Prior to issuance of a Building Permit, the applicant shall submit the following documentation to the Planning Division:
  - a. Landscape Documentation Package, which includes date; project applicant/contact information; project address; total landscape area; project type (new, rehabilitated, public, private, cemetery, homeowner-installed); water supply type (potable, recycled, well, greywater, combination of potable/greywater); Water Efficient Landscape Worksheet; Soil Management Report; Landscape Design Plan; Irrigation Design Plan; Grading Design Plan; and applicant signature/date with the statement that "I agree to comply with the requirements of the Water Efficient Landscape Ordinance."
  - b. Certificate of Completion
9. In accordance with the timing requirements below, the landscape architect or landscape designer shall certify in writing to the Director of Community Development that the landscaping has been installed in accordance with the approved landscape and irrigation plans with respect to size, number, and species of plants and overall design concept. A special inspection by the Planning Division shall be coordinated with regards to landscaping and irrigation.

Landscaping installation time requirements:

1. Prior to occupancy, all front yard landscaping shall be installed and inspected; and
  2. The remaining landscaping not specified above but shown on the final landscape plan (i.e., those areas between the rear property line (eastern side of subject parcel) and the house and those areas south of the house) shall be installed by the homeowner within nine months of occupancy. The homeowner shall arrange a landscape/irrigation site inspection with the Planning Division within thirty (30) days of completion of the side and rear yard landscaping/irrigation system installation.
10. Prior to occupancy, the property owner shall replace with new trees any dead mitigation trees on the subject lot that were required pursuant to PUD-54 and Tract 7815, consistent with the City approved tree replacement plan as determined by the Director of Community Development. Adequate irrigation shall also be provided.
  11. All retaining walls shall be stone-faced to match the stone of the proposed residence.
  12. All exterior lighting including landscape lighting shall be directed downward and designed or shielded so as to not shine onto neighboring properties. The project/building developer shall submit a final lighting plan, and include drawings and/or manufacturer's specification sheets showing the location, size and types of light fixtures proposed for the exterior of the buildings. All wall-mounted lighting shall be complementary to the architectural style of the residence. The revised landscape plan shall also show the removal of all landscaping up-lights.

13. The electrical plan for the home shall provide telecommunications infrastructure consistent with state-of-the-art methods (e.g. cabling for DSL, broadband, or wireless service, wiring for total room access, etc.) in effect at the time that building permit(s) are issued. The plan shall be part of the building permit plan set.
14. Water conservation devices such as low-flow faucets, toilets, shower fixtures, etc., shall be installed as part of the project. The water conservation devices shall be stated on the plans submitted for the issuance of a building permit.
15. The State of California's Green Building Standards Code, "CALGreen", as amended, shall apply, as applicable.
16. Only recycled water shall be used on the site during the grading and construction periods, and this specification shall be included on all grading plans and other construction documents.
17. All excess soil from the site shall be off-hauled from the site and disposed of in a lawful manner. No temporary stockpiling of dirt on this site shall occur without specific review and approval by the Planning Division.
18. All demolition and construction activities, inspections, plan checking, material delivery, staff assignment or coordination, etc., shall be limited to the hours of 8:00 a.m. to 5:00 p.m., Monday through Friday. No construction shall be allowed on State or Federal Holidays, Saturdays or Sundays. The Director of Community Development may allow earlier "start-times" or later "stop-times" for specific construction activities (e.g., concrete pouring), if it can be demonstrated to the satisfaction of the Director of Community Development that the construction noise and construction traffic noise will not affect nearby residents or businesses. All construction equipment must meet Department of Motor Vehicles (DMV) noise standards and shall be equipped with muffling devices. Prior to construction, the applicant shall post on the site the allowable hours of construction activity.
19. The building permit plan check package will be accepted for submittal only after completion of the 15-day appeal period, measured from the date of the approval letter, unless the project developer submits a signed statement acknowledging that the plan check fees may be forfeited in the event that the approval is overturned on appeal, or that the design is significantly changed as a result of the appeal. In no case will a building permit be issued prior to the expiration of the 15-day time-period.

## **STANDARD CONDITIONS**

### **Community Development Department**

20. The project applicant/developer shall submit a refundable cash bond for hazard and erosion control. The amount of this bond will be determined by the Director of Community Development. The cash bond will be retained by the City until all the permanent landscaping is installed for the development, including individual lots, unless otherwise approved by the department.

21. The project developer shall submit a written dust control plan or procedure as part of the improvement plans.
22. If any prehistoric or historic artifacts, or other indication of cultural resources are found once the project construction is underway, all work must stop within 20 meters (66 feet) of the find. A qualified archaeologist shall be consulted for an immediate evaluation of the find prior to resuming groundbreaking construction activities within 20 meters of the find. If the find is determined to be an important archaeological resource, the resource shall be either avoided, if feasible, or recovered consistent with the requirements of the State CEQA Guidelines. In the event of discovery or recognition of any human remains in any on-site location, there shall be no further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent remains until the County coroner has determined, in accordance with any law concerning investigation of the circumstances, the manner and cause of death and has made recommendations concerning treatment and dispositions of the human remains to the person responsible for the excavation, or to his/her authorized representative. A similar note shall appear on the improvement plans.
23. The applicant shall pay any and all fees to which the property may be subject prior to issuance of building permits. The type and amount of the fees shall be those in effect at the time the building permit is issued. This includes, but is not limited to, the park dedication fees.
24. The applicant shall pay the applicable Zone 7 and City connection fees and water meter cost for any water meters, including irrigation meters. Additionally, the applicant shall pay any applicable Dublin San Ramon Services District (DSRSD) sewer permit fee prior to issuance of a building permit.

### **Planning Division**

25. To the extent permitted by law, the project applicant shall defend (with counsel reasonably acceptable to the City), indemnify and hold harmless the City, its City Council, its officers, boards, commissions, employees and agents from and against any claim (including claims for attorney's fees), action, or proceeding brought by a third party against the indemnified parties and the applicant to attack, set aside, or void the approval of the project or any permit authorized hereby for the project, including (without limitation) reimbursing the City its attorney's fees and costs incurred in defense of the litigation. The City may, in its sole discretion, elect to defend any such action with attorneys of its choice.
26. The Applicant shall work with the Pleasanton Unified School District (PUSD) to develop a program to offset this project's long term effect on school facility needs in Pleasanton in addition to the school impact fees required by State law. This program shall be designed to fund school facilities necessary to offset this project's reasonably related effect on the long-term need for expanded school facilities. The method and manner for the provision of these funds and/or facilities shall be approved by the PUSD and in place prior to building permit issuance. Written proof of compliance with this condition shall be provided by Applicant to the City, on a form generated by the PUSD, prior to building permit issuance.

27. The applicant/building developer shall submit a final list of the green building measures used in the design of the house covered by this approval to the Planning Division for the review and approval by the Director of Community Development prior to the building permit submittal. The home shall be designed to achieve a "certified rating" of a minimum of 50 total points, achieving at least the minimum points in each category, using BuildItGreen's current GreenPoints rating system. Notwithstanding the foregoing, the State of California's Green Building Standards Code, "CALGreen", as amended, shall also apply.

The green building measures shall be shown on one of the first two pages of the plans submitted for issuance of a building permit. Each point identified shall have a notation indicating the sheet the point can be found, and each sheet shall note where the point is located. All proposed green building measures shall be shown throughout the plan set, as appropriate, as determined by the Director of Community Development.

A special inspection by from the Planning Division shall be coordinated with regards to landscaping, irrigation, and exterior materials. All of the green building measures indicated on the approved checklist shall be inspected and approved by either the City of Pleasanton, or a third party rater, or the applicants shall provide written verification by the project engineer, architect, landscape architect, or designer.

28. The residence shall be constructed to allow for future installation of a photovoltaic (PV) system and solar water heating systems. The project applicant shall comply with the following requirements for making the dwelling photovoltaic-ready and solar-water-heating-ready:
- a. Electrical conduit and cable pull strings shall be installed from the roof/attic area to the building's main electrical panels;
  - b. An area shall be provided near the electrical panel for the installation of an "inverter" required to convert the direct current output from the photovoltaic panels to alternating current;
  - c. Engineer the roof trusses to handle an additional load as determined by a structural engineer to accommodate the additional weight of a prototypical photovoltaic system beyond that anticipated for roofing;
  - d. Plumbing shall be installed for solar-water heating; and
  - e. Space shall be provided for solar-heating tank.

These measures shall be shown on the building permit plan set submitted to the Director of Community Development for review and approval before issuance of the first building permit.

29. All HVAC condensing units shall be located on the plans.
30. Only gas fireplaces, pellet fueled wood heaters or EPA certified wood-burning appliances may be installed.

31. Planning Division approval is required before any changes are implemented in site design, grading, house design, house colors or materials, green building measures, landscape material, etc.
32. The developer and future homeowners are encouraged to use reclaimed gray water, rain water, etc., for landscape irrigation. If used, the details shall be shown on the permit plan set to the satisfaction of the Director of Community Development before issuance of a building permit.
33. The developer and future homeowners are encouraged to use best management practices for the use of pesticides and herbicides.
34. The project developer must provide to the Director of Community Development a building height certification performed by a licensed land surveyor or civil engineer. Said certification must allow for the installation of finished roof materials and must meet the approved building height.
35. The approved building materials and colors shall be stated on the plans submitted for issuance of building permits.
36. Campers, trailers, motor homes, or any other similar vehicle are not allowed on the construction site except when needed as sleeping quarters for a security guard.
37. A construction trailer shall be allowed to be placed on the project site for daily administration/coordination purposes during the construction period.
38. Portable toilets used during construction shall be kept as far as possible from existing residences and shall be emptied on a regular basis as necessary to prevent odor.
39. The project developer shall submit a building pad elevation certification and foundation certification prepared by a licensed land surveyor or registered civil engineer to the Chief Building Official, certifying that the pad elevations and building locations (setbacks) conform to the approved plans, prior to receiving a foundation inspector for the structures.

### **Building Division**

40. All retaining walls higher than four feet from the top of the wall to the bottom of the footway shall be constructed of reinforced concrete, masonry, or other material as approved by the Director of Community Development, or shall be an approved crib wall type. Calculations signed by a registered civil engineer shall accompany the wall plans.
41. At the time of building permit plan submittal, the project developer shall submit a final grading and drainage plan prepared by a licensed civil engineer depicting all final grades and on-site drainage control measures to prevent stormwater runoff onto adjoining properties.

42. Prior to issuance of building or demolition permits, the applicant shall submit a waste management plan to the Building and Safety Division. The plan shall include the estimated composition and quantities of waste to be generated and indicate how the project developer intends to recycle at least 75 percent of the total job site construction and demolition waste measured by weight or volume. Proof of compliance shall be provided to the Chief Building Official prior to the issuance of a final building permit. During demolition and construction, the project developer shall mark all trash disposal bins "trash materials only" and all recycling bins "recycling materials only." The project developer shall contact Pleasanton Garbage Service for the disposal of all waste from the site.

### **Landscaping**

43. The project developer shall comply with the recommendations of the tree report prepared for Owner/Applicant by HortScience, Inc. dated February 2, 2016, except that tree No. 7 shall be saved. No tree trimming or pruning other than that specified in the tree report shall occur. The project developer shall arrange for the horticultural consultant to conduct a field inspection prior to issuance of City permits to ensure that all recommendations have been properly implemented. The consultant shall certify in writing that such recommendations have been followed.
44. The project developer shall post cash, letter of credit, or other security satisfactory to the Director of Community Development in the amount of \$5,000 for each tree required to be preserved, up to a maximum of \$25,000. This cash bond or security shall be retained for one year following acceptance of public improvements or completion of construction, whichever is later, and shall be forfeited if the trees are destroyed or substantially damaged. No trees shall be removed other than tree No. 11 as indicated in the tree report.
45. The following statements shall be printed on the site, grading, and landscape plans where applicable to the satisfaction of the Director of Community Development prior to issuance of a building permit:
  - a. No existing tree may be trimmed or pruned without prior approval by Community Development Director.
  - b. No equipment may be stored within or beneath the driplines of the existing trees.
  - c. No oil, gasoline, chemicals, or other harmful materials shall be deposited or disposed within the dripline of the trees or in drainage channels, swales, or areas that may lead to the dripline.
  - d. No stockpiling/storage of fill, etc., shall take place underneath or within five feet of the dripline of the existing trees.
46. Prior to issuance of a grading or building permit, the project developer shall install a temporary six foot tall chain-link fence (or other fence type acceptable to the Director of Community Development) outside of the existing tree drip lines, as shown on the plans. The fencing shall remain in place until final landscape inspection by Community

Development Department. Removal of such fencing prior to that time may result in a "stop work order."

47. The applicant shall comply with the following tree root cutting requirements:
- Roots that are one inch (1") in diameter and smaller are not considered to be significant and may be removed by the most efficient means.
  - Within eight feet (8') of the tree trunk, no roots larger than two inches (2") in diameter shall be cut or ground unless prior approval has been received from the Director of Community Development.
  - Farther than eight feet (8') from the tree trunk, roots of any diameter may be ground a maximum of one-half (1/2) of their diameter if they are in conflict with the proposed work. Work of this nature shall only be performed using a mechanical stump grinder and only by personnel experienced with its operation.
  - Farther than eight feet (8') from the tree trunk, roots up to six inches (6") in diameter may be removed if they are in conflict with the proposed work. Roots that are removed shall be cleanly cut using a hand saw.
48. The project developer shall provide root control barriers and four inch perforated pipes for street trees and trees in planting areas less than ten feet in width, as determined necessary by the Director of Community Development at the time of review of the final landscape plans.
49. For purposes of erosion control, the applicant/developer shall plant a hydroseed mixture that has been designed by the project Landscape Architect. The hydroseed mixture shall be specified on the building permit plans for review and approval by the Director of Community Development and shall be maintained by the applicant/developer.

### **Engineering Department**

50. The project developer shall comply with the recommendations of the Subdivisions' geotechnical report approved as part of PUD-54. The project developer shall hire a geotechnical consultant to review and approve all foundation, retaining wall, and drainage geotechnical aspects of the final development plans to ensure that the recommendations have been properly incorporated into the development. The consultant shall certify by writing on the plans or as otherwise acceptable to the City Engineer that the final development plan is in conformance with the geotechnical report approved with the Subdivision as part of PUD-54.
51. The haul route for all materials to and from this development shall be approved by the City Engineer prior to the issuance of a permit, and shall address the need to schedule major truck trips and deliveries during off peak travel times, to avoid peak travel congestion. It shall also include the provision to monitor the street surfaces used for the haul route so that any damage and debris attributable to the haul trucks is identified and corrected at the expense of the project applicant or developer.

52. All dry utilities (electric power distribution, gas distribution, communication service, Cable television, street lights and any required alarm systems) required to serve existing or new development shall be installed in conduit, underground in a joint utility trench unless otherwise specifically approved by the City Engineer.
53. Any damage to existing street improvements during construction on the subject property shall be repaired to the satisfaction of the City Engineer at full expense to the project developer and includes but is not limited to slurry seal, overlay, restoration of landscaping and irrigation system, signing, striping, pavement marking or street reconstruction if deemed warranted by the City Engineer.
54. This approval does not guarantee the availability of sufficient water and/or sewer capacity to serve the project.
55. There shall be no direct roof leaders connected to the street gutter or storm drain system, unless otherwise approved by the City Engineer.
56. The project developer and/or the project developer's contractor(s) shall obtain an encroachment permit from the City Engineer prior to any work to be performed within the public right of way.
57. The project developer shall submit a final grading and drainage plan prepared by a licensed civil engineer depicting all final grades and drainage control measures, including concrete-lined V-ditches, to protect all cut and fill slopes from surface water overflow. This plan shall be subject to the review and approval of the City Engineer prior to the issuance of a grading permit.
58. The project developer shall include erosion control measures on the final grading plan, subject to the approval of the City Engineer. The project developer is responsible for ensuring that the contractor is aware of such measures. All cut and fill slopes shall be revegetated and stabilized as soon as possible after completion of grading, in no case later than October 15. No grading shall occur between October 15 and April 15 unless approved erosion control measures are in place, subject to the approval of the City Engineer. Such measures shall be maintained until such time as a permanent landscaping is in place.
59. All retaining walls along the street shall be placed behind the Public Service Easement (PSE), unless otherwise approved by the City Engineer.

### **Fire Department**

60. The project developer shall keep the site free of fire hazards from the start of construction until the final inspection.

### **Urban Stormwater**

60. The project shall comply with the "Alameda Countywide NPDES Permit #CAS612008 dated November 19, 2015 and amendments to this permit" issued by the California Regional Water Quality Control Board, San Francisco Bay Region, a copy of which is

available at Community Development Department, Public Works/Engineering section at City offices, Alameda County Clean Water Program, at the State Water Board, and the following websites:

[http://www.waterboards.ca.gov/sanfranciscobay/water\\_issues/programs/stormwater/Municipal/index.shtml](http://www.waterboards.ca.gov/sanfranciscobay/water_issues/programs/stormwater/Municipal/index.shtml);

and

[http://www.swrcb.ca.gov/sanfranciscobay/water\\_issues/programs/stormwater/Municipal/R2-2015-0049.pdf](http://www.swrcb.ca.gov/sanfranciscobay/water_issues/programs/stormwater/Municipal/R2-2015-0049.pdf)

#### A. Design Requirements

1. The Permit design requirements include, but are not limited to, the following:
  - a. Source control, site design measures, and design and implementation of stormwater treatment measures are required when commercial, industrial or residential development creates and replaces 10,000 square feet or more of impervious surface, including roof area, streets and sidewalk.
  - b. The Permit requires a proactive Diazinon pollutant reduction plan (aka Pesticide Plan) to reduce or substitute pesticide use with less toxic alternatives.
2. The following requirements shall be incorporated into the project:
  - a. The project developer shall submit a final grading and drainage plan prepared by a licensed civil engineer depicting all final grades and on-site drainage control measures including bio-swales. Irrigated bio-swales shall be redesigned as needed to the satisfaction of the City Engineer to optimize the amount of the stormwater running off the paved surface that enters the bio-swale at its most upstream end. This plan shall be subject to the review and approval of the City Engineer prior to the issuance of any building permits.
  - b. Landscaping shall be designed to minimize irrigation and runoff, promote surface infiltration where appropriate and acceptable to the project soils engineer, and minimize the use of fertilizers and pesticides that can contribute to stormwater pollution.
    - Structures shall be designed to prohibit the occurrence and entry of pests into buildings, thus minimizing the need for pesticides.
    - Where feasible, landscaping shall be designed and operated to treat stormwater runoff. In areas that provide detention of water, plants that are tolerant of saturated soil conditions and prolonged exposure to water shall be specified. Soil shall be amended as required. (See planting guidelines of the Alameda County Clean Water Program.)

- Plant materials selected shall be appropriate to site specific characteristics such as soil type, topography, climate, amount and timing of sunlight, prevailing winds, rainfall, air movement, patterns of land use, ecological consistency and plant interactions to ensure successful establishment.
  - Landscaping shall also comply with City of Pleasanton ordinances and policies regarding water conservation.
- c. Roof drains shall discharge and drain away from the building foundation. Ten percent of the stormwater flow shall drain to a landscaped area or to an unpaved area wherever practicable.

## B. Construction Requirements

The project developer is responsible for implementing the following Best Management Practices (BMPs). These, as well as any other applicable measures, shall be included in the Stormwater Pollution Prevention Plan (SWPPP) and implemented as approved by the City.

- a. The project developer shall include erosion control/stormwater quality measures on the final grading plan which shall specifically address measures to prevent soil, dirt, and debris from entering the storm drain system. Such measures may include, but are not limited to, hydroseeding, hay bales, sandbags, and siltation fences and are subject to the review and approval of the City Engineer/Chief Building Official. If no grading plan is required, necessary erosion control/stormwater quality measures shall be shown on the site plan submitted for an on-site permit, subject to the review and approval of the Building and Safety Division. The project developer is responsible for ensuring that the contractor is aware of and implements such measures.
- b. All cut and fill slopes shall be revegetated and stabilized after completion of grading, but in no case later than October 15. Hydroseeding shall be accomplished before September 15 and irrigated with a temporary irrigation system to ensure that the grasses are established before October 15. No grading shall occur between October 15 and April 15 unless approved erosion control/stormwater quality measures are in place, subject to the approval of the City Engineer/Chief Building Official. Such measures shall be maintained until such time as permanent landscaping is in place.
- c. Gather all sorted construction debris on a regular basis and place it in the appropriate container for recycling to be emptied at least on a weekly basis. When appropriate, use tarps on the ground to collect fallen debris or splatters that could contribute to stormwater runoff pollution.
- d. Remove all dirt, gravel, rubbish, refuse, and green waste from the street pavement and storm drains adjoining the site. Limit construction access routes onto the site and place gravel on them. Do not drive vehicles and equipment off paved or graveled areas during wet weather. Broom sweep the street pavement adjoining

the project site on a daily basis. Scrape caked-on mud and dirt from these areas before sweeping.

- e. Install filter materials (such as sandbags, filter fabric, etc.) at the storm drain inlet nearest the downstream side of the project site in order to retain any debris or dirt flowing into the storm drain system. Maintain and/or replace filter materials to ensure effectiveness and to prevent street flooding.
- f. Create a contained and covered area on the site for the storage of cement, paints, oils, fertilizers, pesticides, or other materials used on the site that have the potential of being discharged into the storm drain system through being windblown or in the event of a material spill.
- g. Never clean machinery, equipment, tools, brushes, or rinse containers into a street, gutter, or storm drain.
- h. Ensure that concrete/gunite supply trucks or concrete/plaster operations do not discharge wash water into street, gutters, or storm drains.

### C. Operation Requirements

The following requirements shall be incorporated into the project:

- a. The applicant, present homeowner, and future homeowners of the home covered by this approval are encouraged to use best management practices for the use of pesticides and herbicides.
- b. Vegetated swales with grasses shall be mowed and clippings removed on a regular basis.

### **CODE REQUIREMENTS**

*Applicants/Developers are responsible for complying with all applicable Federal, State and City codes and regulations regardless of whether or not the requirements are part of this list. The following items are provided for the purpose of highlighting key requirements.*

#### **Building Division**

- 61. The project developer shall submit a building survey and/or record of survey and a site development plan in accordance with the provisions of Chapter 18.68 of the Municipal Code of the City of Pleasanton. These plans shall be approved by the Chief Building and Safety Official prior to the issuance of a building permit. The site development plan shall include all required information to design and construct site, grading, paving, drainage, and utilities.
- 62. The project developer shall post address numerals on the building so as to be plainly visible from all adjoining streets or driveways during both daylight and night time hours.

63. The building covered by this approval shall be designed and constructed to meet Title 24 state energy requirements.
64. All building and/or structural plans must comply with all codes and ordinances in effect before the Building and Safety Division will issue permits.

### **Fire Department**

65. All construction shall conform to the requirements of the California Fire Code currently in effect, City of Pleasanton Building and Safety Division and City of Pleasanton Ordinance 2015. All required permits shall be obtained.
66. Automatic fire sprinklers shall be installed in all occupancies in accordance with City of Pleasanton Ordinance 2015. Installations shall conform to the National Fire Protection Association (NFPA) Pamphlet 13 for commercial occupancies, NFPA 13D for residential occupancies, and NFPA 13R for multifamily residential occupancies.
67. Fire alarm system shall be provided and installed in accordance with the CFC currently in effect, the City of Pleasanton Ordinance 2015 and 2002 NFPA 72 - National Fire Alarm Code. Notification appliances and manual fire alarm boxes shall be provided in all areas consistent with the definition of a notification zone (notification zones coincide with the smoke and fire zones of a building). Shop drawings shall be submitted for permit issuance in compliance with the CFC currently in effect.
68. All buildings undergoing construction, alteration or demolition shall comply with Chapter 14 (California Fire Code currently in effect) pertaining to the use of any hazardous materials, flame-producing devices, asphalt/tar kettles, etc.
69. The building (s) covered by this approval shall conform to the requirements of the California Building Code currently in effect, the California Fire Code currently in effect and the City of Pleasanton Ordinance 2015. If required plans and specifications for the automatic fire sprinkler system shall be submitted to the Livermore-Pleasanton Fire Department for review and approval prior to installation. The fire alarm system, including water flow and valve tamper, shall have plans and specifications submitted to Fire Prevention for review and approval prior to installation. All required inspections and witnessing of tests shall be completed prior to final inspection and occupancy of the building(s).

< End >
