I discover new/different worlds when I read the books offered by the library. I enjoy reading non-fiction books that inform me about people/places I'd otherwise never know about

“We just wanted to let you know how impressed we were with your story time leader at the Pleasanton Library. I was with my daughter and my two-year-old twin grandchildren and loved everything about him. He was very expressive, patient, and super outgoing. He is definitely an asset to the Pleasanton Library. We cannot wait to attend his session again next Monday. Please let him know how beyond happy we are with him.”

“I am a father that asked to stay with my son throughout the [Paws to Read] program as he has a condition called “selective mutism” due to anxiety...for my son, this is the first time in his life he is able to read in a new environment, a full story book from the first page till the end. To put that in contrast, he has spoken zero words so far in school during kindergarten and 1st grade. Again, really appreciate the program, your accommodation today and we are super happy for his progress.”

“I love to read and so enjoy meeting once a month with a library staffer and my fellow seniors to discover what books they recommend. The representative helps us keep abreast of what is new in the library community. Her enthusiasm and knowledge is so appreciated.”

“Years after attending classes at Pleasanton Library, I have actually realized my listening comprehension becoming better than before. It has been easier for me to listen to American news on both TV and radio stations. I am making progress in communicating with people in English. My reading skills have improved, too. This progress means a lot to me. I am happy about it because I want to fully fit in the American society where as a citizen, I have lived for more than two decades...Thank you, Pleasanton Library!”
