

Description of TNT Fire Protection Inc. Business

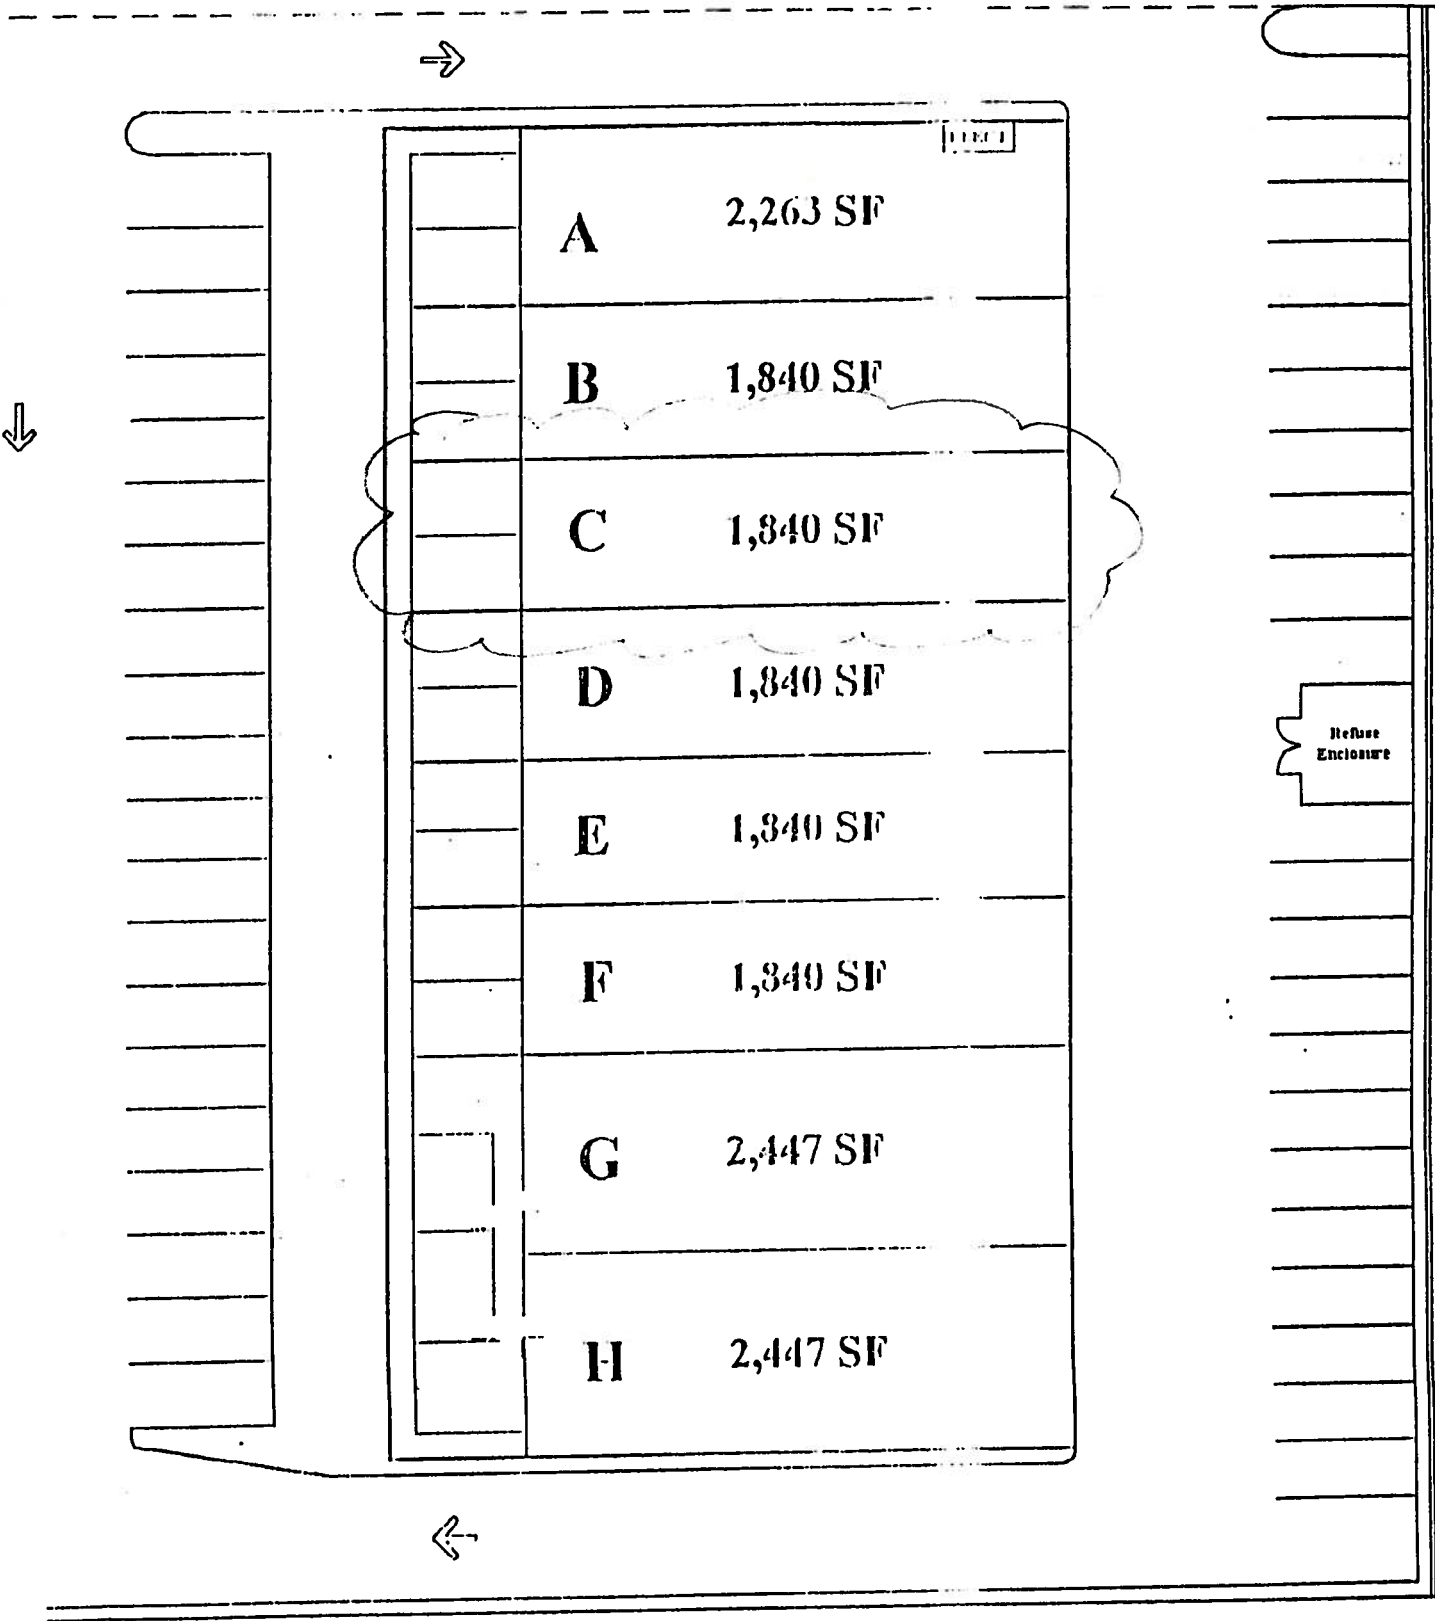

TNT installs and inspects fire sprinkler systems for commercial and residential buildings. This includes sales, engineering and design, fabrication, assembly and installation of new fire sprinkler piping and valves, etc.. TNT provides testing and inspecting services for existing and new fire sprinkler systems.

At the 1039C location there will be approximately 3-5 employees. Most fabrication and assembly of the piping and other hardware associated with a functioning fire sprinkler system is done at the job site. Some fabrication will be done at the 1039C. The warehouse portion of the 1039C will be used for storage of materials and parts associated with fire sprinkler systems and for storage of tools of the trade. The office portion of the space will be used for the operational activities of the business.
