Associate Planner
City of Pleasanton
Post Office Box 520
Pleasanton, CA 94588

Re: Wagner Property; PUD-97, RZ

Dear Ms. Amos:

Please find enclosed the revised Project plans to accompany this revised Project Description letter for the subject application.

Since meeting together in early April of this year, we have worked hard to revise the Project to respond to City Staff comments. Most notably, we have modified the proposal to eliminate the proposed demolition of the existing house at 4202 Stanley Boulevard resulting from feedback by various members of the Historical Preservation Task Force desiring that the house remain due to its age, design, and location within the downtown area. The property owners have decided to retain the old house on a 0.22 acre lot which will allow them flexibility to market the property to potential future owners that could be interested in upgrading the structure either as residential or perhaps commercial tenant use compatible with residential homes in the surrounding area (similar to the adjacent home at 4216 Stanley Blvd.).

In summary, the primary changes to the proposal are as follows:

1. Retain and preserve the existing old house on a new 0.22 acre lot;
2. Reduce the overall number of new residential lots from 15 to 12 (or 12 lots plus a remainder lot to total 13) and increase the minimum new lot size from 3,633 to 3,715 square feet; the clarification regarding the OS-PH & WO overlay delineation and developable acreage results in a density of 7.3 du/ac. A public amenity is required to exceed the mid-point density and is yet to be determined; the creation of a large parcel upon which the old house will remain (thus reducing the project scope) could be considered a qualifying amenity, along with park fee contribution. We look forward to additional discussion in this regard, however the Project does not propose an on-site park or open space amenity;
3. Reduce the number of lots along the western portion of the site from seven to five lots (including the existing house lot), and increase the lot size (Lots 1 – 3) to an approximate minimum of 4,360 sq.ft. instead of the previous 3,633 sq.ft. minimum;

4. Increased minimum lot sizes and reduced F.A.R. ranging overall from 0.38 to 0.70 depending upon the specific house plotting; a preliminary plotting plan is provided to demonstrate F.A.R. ranges per individual lot as well as the overall summary;
5. Designate the access serving the new homes as a private rather public street and increase street parking to total 12 vehicles instead of nine, and increase the length of driveways if possible to exceed 20 feet;
6. Eliminate the pedestrian walkway connecting with Verais; the location of this infill site within the downtown makes it "walkable" to services along Stanley Boulevard and thus unnecessary to impact existing Vervais residents;
7. Increase the side yard setback to five and six feet on a majority of the lots on the eastern portion of the site. With the exception of Lot 5, the lots flanking the arroyo area (Lots 4, 6 and 7) will have a minimum 6.5 or greater side yard setback with a 13 to 14 feet aggregate between buildings. Previously a minimum aggregate of ten feet was proposed; and
8. Designate the Plan 1SR on Lot 12 thus having a full length and wrap-around porch to front onto Stanley Boulevard consistent with the downtown character; porches are provided on all of the homes as is other architectural forms such as lap siding, corbels, varied roof designs (hipped, gable and shed combinations).

Regarding affordable units, the Project requires 2.4 units. Ponderosa will utilize 4.0 credits available under the existing Ironwood Affordable Housing Agreement, plus additional fees to comply with this requirement. Also for clarification, the Project does not propose Stanley Boulevard frontage improvements other than the new private street tie-in and necessary utility connections, thus pro-rata share fees will be paid towards the City CIP.

Ponderosa will work together with Mr. Swift regarding an enhanced fence or masonry wall along the shared east boundary line; however, at this time we must ascertain the number of lots that will ultimately approved along with having an understanding of the associated grading, survey of boundary lines and potential encroachments onto the property, etc. prior to a commitment. We anticipate the treatment of the shared boundary will be resolved during the tentative map phase of the Project.

Lastly, the Tree Report was updated to clarify the difference between Condition Rating of trees and their recommended Preservation for Suitability. While additional trees beyond the initial proposal will be retained as a result of the 0.22 lot creation (and thus no additional grading in those areas), no other trees are recommended for preservation.

We look forward to discussing the Project merits with the City Staff and to secure a Planning Commission hearing at the earliest opportunity. I can be reached at 925.460.8981.

Very truly yours,

PONDEROSA HOMES II, INC.
